

For what can BSS be used?

Examples for what BSS can be used...

On-the-fly, automatic production and always up-to-date distribution maps for

- Invasive species
- Threatened species
- From all data sources!

Online access to most recent biodata and data sources, including metadata

- Over the web or directly using your tool of choice / in your environment (e.g. ArcMap)
- e.g. "This invasive species has been found by Joe Fish."
- I can contact him about the observation to discuss mitigation options.

Push-of-a-button maps and reports for

- SoE
- Indicators (MCI)
- ... much more
